

Building peace with LEGO

Dienstag, 10:00 - 10:10 Uhr, Raum 12 (Halle 3)

Prof. Luis Guillermo Flores Chávez

Ayuntamiento de Guadalupe

Abstract

In this paper we show the results of the initiative “Building Peace with LEGO ®” applied in the municipality of Guadalupe through the Department of Promotion and Promotion of Values of the Municipality of Guadalupe, Zacatecas, México. Through LEGO ® bricks, children build models with which they share stories and ideas to have conversations and reflect on the importance of building peace and living values in the school environment.

Inspired by the LEGO® Serious Play® methodology, constructivism and constructionism, this program aims to offer new and fun ways to generate meaningful learning for children in the municipality of Guadalupe that transcends in their school environment.
